

Case study: EUC Cloud Implementation

The End-User Computing (EUC) Scan and Secure solution was developed by Brickendon for a global bank to be installed onto localised internal machines and used to meet regulatory requirements. Brickendon Consulting was engaged by the bank to build an EUC solution that was scalable, resilient, and in a controlled environment on the cloud.

Digital

Client Challenges:

- Robust and complex version control systems and audit trails were necessary to manage the localised software
- Software changes could not be executed concurrently due to the lack of significant process controls in an ungoverned environment
- Inability to protect clients' Intellectual Property (IP) due to the lack of an appropriate software delivery lifecycle (SDLC)
- Increased client implementation costs due to the localised solution requiring on-site resources

Brickendon Solution:

- Create a Software as a Service (SaaS) environment for the EUC solution by providing on-demand deployment capabilities
- Establish a localised and centralised software deployment model allowing for customisable client-focused delivery
- Leverage tools to facilitate the rapid deployment of software allowing for dynamic, ad-hoc responses to changes for clients and their internal systems/tooling

Client Benefits:

- The cloud-based solution provides versioning and deployment control to meet regulatory requirements
- Faster time-to-market allows for dynamic changes to comply with existing regulations, as well as the ability to adapt to future regulations
- A multi-instance model creates a cost-effective solution for distribution across numerous clients with disparate project lifecycles
- The solution enables the client to create additional profitability due to the reduction in the manual overheads and regulatory incidents/fines

BRICKENDON
transformational consulting

Brickendon's innovative bespoke solutions help save our clients time, money and resources.

Brickendon is an award-winning transformational consultancy specialising in innovative solutions for the financial services industry. Our aim is to save our clients time and money by addressing their challenges in weeks and not months. The firm is divided into five practices focused on: Strategy; Risk & Regulation; Data; Quality & Testing; and Digital.

Why choose Brickendon?

Our track record: We have demonstrated a long, proven track record for transforming our clients through our innovative bespoke solutions. In 2017 we were nominated as finalists in two categories of the inaugural DevOps awards and are a two-time winner of the European Software Testing Awards.

Our innovative approach: No one client is the same, therefore our intelligent, experienced and focused consultants use their domain experience to address each challenge in an innovative way, using skills from their past and knowledge from Brickendon's continual learning hub.

Our resources: Our onshore, offshore and nearshore capabilities mean we are well placed to cater for all our clients' needs, making the best possible use of the 10 years-plus domain experience of all our consultants.

Our passion: We love what we do and thrive on improving our clients' profitability, efficiency and increasing their competitive edge. We are driven to develop the most innovative solutions and take pride in seeing the tangible benefits of a project come to fruition.
